

MERCURY

MERCURY

Mercury

The Mercury chair is an extremely robust and durable 24 hour chair. Designed with multiple users in mind, the features of the Mercury allow each user to adjust the chair to achieve the most comfortable posture position.

The Mercury has been developed in response to the increasing requirement for 24 hour applications.

The Mercury has a forward seat tilt lever which is designed to help keep the pelvis straight, thus encouraging the spine to assume its natural S shape

The chair is able to fulfil health and safety requirements in being tested to British Standard certification BS 5459: Part 2: 2000 for 24 hour use by persons weighing up to 150kg.
